SUMMARY

Data Science undergraduate passionate about Artificial Intelligence, Machine Learning, Full-Stack Development, and Data Analytics. Experienced in building AI-driven applications, web applications, and data-focused solutions. Seeking opportunities to apply analytical thinking and software development skills to solve real-world problems.

EDUCATION

B.E. – Data Science
Bangalore Institute of Technology, Bengaluru

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Machine Learning, Artificial Intelligence, Data Analytics, Operating Systems

PROJECTS

ScamShield AI – Scam Detecting AI

- Python, Machine Learning, NLP, Scikit-Learn, Streamlit
- Developed an AI-powered scam detection system to classify suspicious messages, emails, and online communications using NLP and ML techniques
 - Implemented text preprocessing, feature extraction, model training, evaluation, and risk-score based prediction workflows
 - Built a user-friendly Streamlit interface for real-time analysis with clear scam/legit output and supporting reasons
 - Demonstrated a practical cybersecurity use case by improving scam-message identification through supervised learning

Currency Exchange Web Application

- React, API Integration, CSS
- Built a responsive web app for real-time currency conversion and exchange-rate tracking using external APIs

Library Management System

- MySQL, SQL
- Designed relational database tables for book inventory, members, and issue/return tracking

SGPA Calculator

- Python, Streamlit
- Created a simple academic calculator to automate SGPA calculation and performance analysis

Billing & Inventory Management System

- Python, PyQt5, Pandas, OpenPyXL
- Implemented inventory tracking, bill generation, and Excel report export for product management

SKILLS

DATA SCIENCE & AI

Pandas NumPy Matplotlib Scikit-Learn
TensorFlow

LANGUAGES

Python SQL C JavaScript TypeScript

WEB

React Next.js Node.js Tailwind
Streamlit

DATABASES

MySQL SQL Server

TOOLS

Git GitHub Docker AWS EC2 Vercel
Linux VS Code

CERTIFICATIONS

- Python Programming
- Data Science Fundamentals
- Machine Learning Basics
- SQL & Database Management

KEY ACHIEVEMENTS

- Built multiple full-stack, database, and AI-based academic projects
- Deployed applications using Vercel and AWS EC2
- Active GitHub contributor with hands-on, project-based learning
- Practiced Data Structures and Algorithms problems on coding platforms
